### PROFILE

Passionate about web and mobile development, I have a solid background in designing, developing, and managing complete applications. With strong teamwork skills and excellent problem-solving abilities, I have gained in-depth expertise in various development environments and the essential tools for a Full Stack Developer.

### PROFESSIONAL EXPERIENCE

#### Ever-co

July 2024 - Present

Full Stack Developer (Remote)

- Ever-co is an international company providing open-source applications for business management, project management, and on-demand applications. Lead, mentor, and manage a high-performing marketing team, fostering a collaborative and results-driven work environment.
- I actively work as an engineer on company and client projects. For the company's internal projects, these involve ERP systems for project management, including business management, sales, billing, and other related projects. The technologies used are Next.js and Nest.js, along with various types of databases.

#### ISDR/GL

Computer Engineer

Nov 2021 - 2024

- ISDR/GL is a higher education institution in the Democratic Republic of Congo, specializing in rural development and agriculture for the Great Lakes region.
- I actively work as an engineer on Linux server management, SQL Server database management, and the maintenance of the institution's computer network.

#### EL-Bamu

Full Stack Developer

Nov 2022 - 2023

- El-Bamu is a company based in South Kivu that offers various services to the residents of South Kivu.
- I actively work as an engineer on the company's and clients' projects.
- The technologies used are Next.js and Express.js, along with various types of databases.

## Front-End Frameworks:

- Next.js
- JavaFX
- React.js
- Flutter

## Back-End Frameworks:

- Hibernate (Java)
- Express.js (JavaScript) and NestJS
- Slime (PHP)
- Django (Python)

## Server Administration:

- VPS Server Management
- Linux Server Management
- Windows Server Management

## IT Maintenance:

- Hardware Troubleshooting
- Software and System Optimization

## Tools:

- Git and GitHub
- Git and GitLab
- Agile Methodology
- Strapi and WordPress

## LANGUAGES

- French: Fluent
- English: Intermediate
- Swahili: Fluent

### Wada Ghana (FreeLance)

Full Stack Developer

Jan. 2023 - 2023

- Wada Ghana is a resource network aimed at unlocking the potential of Africa and its diaspora through distributed ledger technology, artificial intelligence, and automation.
- I actively work as a Full Stack Developer on the company's projects.
- The technologies used are Next.js, Express.js, Haskell, Plutus, and various types of databases.

### Golnnovation (Hackathon)

Mobile Developer

May 2022 - 2022

- GO INNOVATION aims to be the largest digital hub and promoter of innovations in the Democratic Republic of Congo.
- I actively worked on our project called Farida, which is a mobile solution aimed at increasing the revenue of community radio stations.
- The technologies used are Dart and Flutter, Java, with MySQL.

### MDF (Hackathon)

Web Developer

Dec. 2021 - 2021

- MDF is a Non-Governmental Organization (NGO) focused on training and advisory support, with its headquarters located in Goma.
- MDF-AC benefited from a mobile and web application developed by students from ISIG-GOMA during the 2021 Hackathon.
- The technologies used are Django and Flutter, ReactJs, with NoSQL.

### Victory company (FreeLance)

Mobile Developer

Janv. 2020 - 2021

- Victory Company is a fully regional technology company with 100% local ownership, operating in various fields of information technology.
- I actively worked as a mobile developer on the company's project called Volcan Alerte 2020.
- The technologies used are PHP and Flutter, with MySQL.

### Ets Yetu (FreeLance)

Java Developer

March 2019 - 2021

- Ets Yetu is a commercial company focused on the sale of clothing and various other products. We sell in bulk.
- I actively worked as a JavaFX developer on the company's project.
- The technologies used are JavaFX and MySQL.

### Kivu Green Corporation

Mobile Developer

July 2018 - 2020

- KivuGreen is a web-mobile and SMS-USSD platform that connects all actors in the agricultural sector to markets and agricultural information.
- I actively worked as a Mobile Developer on the company's project.
- The technologies used are Flutter and Express.Js.

## **Faysal company**

Mobile Developer

Jan. 2017 - 2019

- Tap and Pay is an intelligent electronic payment solution for the African market and worldwide, aimed at supporting the population.
- I actively worked as a Mobile Developer on the company's project.
- The technologies used are Java and Android.

## **Uptodate Developers (FreeLance)**

Mobile Developer

May 2017 - 2018

- Promote new information and communication technologies by developing digital solutions designed to address the problems and challenges of the community.
- I actively worked as a Mobile Developer on the company's project.
- The technologies used are Java and Android.

## **MamuPhar**

JavaFX Developer

Octo. 2017 - 2023

- MamuPhar is an establishment specialized in the distribution and management of medicines and healthcare products (Pharmaceutical Depot).
- I actively worked as a Desktop Developer on the company's project.
- The technologies used are JavaFX and SQL Server.
